**Celebrating over 150 Years of  
Manufacturing of Malleable Iron Castings**

# OPTIONS GUIDE

Thank you for taking time to choose our products to go with either your new windows or doors, or if you are planning to refurbish your current windows and doors.

Over time windows and doors have evolved to offer improved thermal efficiency and enhanced security with modern window fittings. Somehow the quintessential British window handle had been lost with the drive to improve windows and doors.

Traditional Window Fittings Ltd offer you a range of authentic fittings to suit most modern windows and doors via a network of specialist installation partners.

Our products are made using two methods of casting, either malleable iron greensand cast or solid brass cast. All our products are made in Britain using traditional casting methods, all products are polished and assembled by hand before the final finishing paint or plating is applied.

The following options offer an extensive range of shapes, styles and colours, but should you have a particular product or colour in mind please do not hesitate to contact us as we produce many special one-off products or colours. Subject to written agreement by all parties involved.

whole handle unit

Variations of ironmongery products are available upon request.

Due to the printing process involved the actual products shown in this brochure may differ slightly in shape and colour from the pictures shown.

Prices in effect from 1st September 2013. All prices are plus VAT at the current rate.

Small value orders subject to delivery charge. Bacs or cheque payment is required on delivery.

For new windows and doors or refurbishment projects, please ensure your product choice is compatible with your chosen installer's product range. If your project involves new build works, please visit our technical and product care information at [www.traditionalwindowfittings.co.uk](http://www.traditionalwindowfittings.co.uk) for pre-installation advise. Should you have any further questions please do not hesitate to contact us.

Due to the nature of our hand built products no two handles look exactly the same and the operational pressure required to move the handles might also differ from product to product.

Our letter plates are made by traditional methods to look original, due to the nature of the methods of manufacture these letter plates may allow slight wind and or water penetration.

Once installed our products will require the occasional light cleaning and oiling between the moving parts, please note some of the applied finishes on our solid brass based products will age with time. Full care and maintenance instructions will be supplied with your order, by following these instructions our products will last a lifetime.
